

ATTENTION ALL NEVADA TRUCKERS WITH NDOT OR DMVMC PERMITS!

The Nevada Department of Transportation's expanded web site is your best source for current information and the latest route restrictions on your over-sized and overweight vehicle permits. Due to the high cost of postage and our high number of clients (now over 1400), we will not be using bulk mail in the future to provide you updated restrictions or instructions. To serve this purpose, we are setting up a web-based bulletin service which will broadcast notices via e-mail to those who sign-up.

As a condition of each permit, permittees accept responsibility for complying with all appropriate regulations and instructions. To get the latest instructions and restrictions now and in the future, we invite you to www.nevadadot.com/business/trucker/. You should download and carry in your cab any information appropriate to your permit. Specifically, you need the enclosure including the route restrictions list and map that comes with any applicable letter of instruction. Most recently, we have posted:

1. Letter of Instruction 1-08: General and Special Conditions for Permits (applies to all permittees)
2. Letter of Instruction 3-09: Routes Restricted/Prohibited to Wide and Long Vehicles (applies to non-reducible, over-sized permittees and reducible, longer combination vehicles over 70 feet in length)
3. Letter of Instruction 5-09: Routes Prohibited due to Spring Thaw Conditions, 2/1/09 – 4/30/09 (applies to all overweight permittees)
4. Letter of Instruction 8-08: Bridges and Routes Restricted/Prohibited to Overweight Vehicles (applies to all overweight permittees)
5. R161-07A: Recent Changes to Nevada Administrative Code 484 (applies to all non-reducible, over-sized and over-weight permittees)

If for some reason, you do not have access to our website, contact one of our permit agents, and we will gladly e-mail, fax or mail any documents or maps you need. Stay Safe and Happy New Year!

Susan, Sandy, Kristin, Kelly, Angie and Jeff
